Bottom Ash Production and Use with Percent

- **Produced**: Vertical bars representing the production of bottom ash in millions of short tons for each year from 2000 to 2015.
- **Percent Used**: A line graph on the right axis showing the percent used over the same period.

The graph illustrates the production and usage trends of bottom ash over the years, with a noticeable increase in production around 2002 and fluctuations in usage percentages.
All CCPs Production and Use with Percent

- **Produced**: Bar chart showing the production of CCPs from 1991 to 2015.
- **Used**: Stacked bar chart indicating the usage of CCPs alongside production.
- **Percent Used**: Line chart on the right axis showing the percentage of CCPs used from 1991 to 2015.

The chart illustrates the increasing trend in production and usage of CCPs over the years, with a notable rise in the percent used after 2000.
