ACAAEF ANNOUNCES SCHOLARSHIP AWARDS

Farmington Hills, MI – The American Coal Ash Association Educational Foundation (ACAAEF) is pleased to announce the awarding of thirteen scholarships to graduate and undergraduate students with interest in the management and beneficial use of coal combustion products (CCP). The awards range from \$1,500.00 to \$5,000.00. In 2020, applicants represented a wide variety of fields of study ranging from civil engineering to material science to environmental engineering to public policy.

Students receiving stipends include Amanda Basantis of the University of Virginia; Daniel Benkeser of the Georgia Institute of Technology; Mohammed Dardona of Wayne State University; Farzaneh Elyasigorji of the University of Wisconsin – Milwaukee; Eberechi Ichi of the University of North Dakota; Engy Khoshit of Drexel University; Zhipeng Li of Washington State University; Ifeanyi Mbah of Tufts University; Dimitrios Porter of Wayne State University; Sivakumar Ramanathan of the University of Miami; Pravin Saraswatula of Texas A&M University; Casey Sundberg of Michigan Technological University; and Ying Wang of the University of Miami.

The ACAAEF was established by the American Coal Ash Association to promote the understanding the management and beneficial use of coal combustion products through scholarship awards, development and distribution of educational materials, supporting targeted research, and sponsorship of educational forums.
